

Line Up Mat

*Note: make sure child bends knees both jumping and landing.

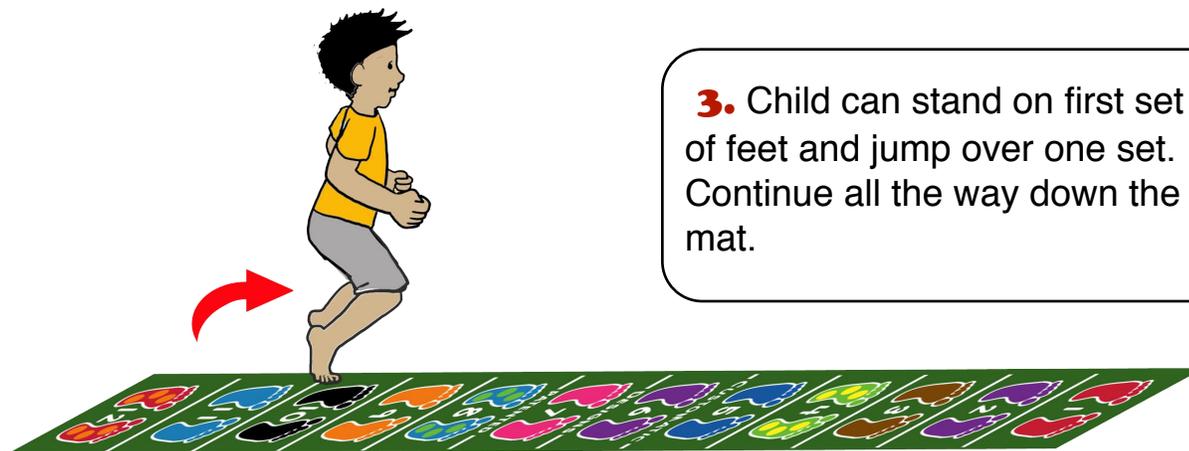

1. This mat can be used for children to line up before going outside. Teacher can call out a color or number for each child to go to, which is also a fun learning game.

2. Child can stand on the number 12, and jump forward to each set of feet calling out each number as they land on it. Also, they can name the color on the feet. They can also jump backward to each set of feet.

3. Child can stand on first set of feet and jump over one set. Continue all the way down the mat.

Warning: All mats and skills should only be used with adult supervision.
